Certified Lead Renovator Course at EIA 2010 National Conference & Exposition!

Saturday, March 27, 2010, Hyatt Regency Austin, TX

Joy Finch will lead this 8-hour seminar. The registration for this training is \$225 for EIA members, and \$275 for non members.

In April 2010, this certification will become MANDATORY for anyone who could potentially expose children to lead dust. This course covers all the EPA requirements under the Lead Renovation, Repair and Painting Rule (LRRP) to enable a firm to apply for EPA Renovation Firm Certification or to certify an individual as a Certified Lead Renovator". Under the new rules, trained contractors and workers must follow lead- safe work practice standards to reduce potential exposure to dangerous levels of lead during renovation and repair activities. All firms and individuals must be certified before April 22, 2010 if they are working in conducting renovation, repair or repainting. This course covers the required classroom modules and the hands on skill assessments.

About Environmental Information Association

The Environmental Information Association, with its beginnings as the National Asbestos Council, has spent over 25 years at the forefront in providing the environmental industry with the information needed to remain knowledgeable, responsible, and competitive in the environmental health and safety industry. Contact the EIA or visit their web site for registration www.eia-usa.org.
